Image Thumbnail CP ActiveX Control is a library that you can use in order to offer an application you develop the possibility to display images in thumbnail sizes for a large number of formats. With it, you are able to view previews for images in BMP, GIF, ICO, JPEG, J2K, JP2, JPC, J2C, PCX, PNG, PSD, TIF, WMF, WBMP, TGA, PGX, RAS and PNM formats. The library is compatible with C#, C,

VB.NET, VB, Delphi and Access developed applications. Image Thumbnail CP ActiveX Control also allows the use of customizable file formats and each of the thumbnails can display tooltips. Moreover, you are able to define custom tooltip text. The library can select multiple clips, show the tooltips for each one, define text for each image and load the thumbnails from a folder. If you encounter files in TIFF or PDF format, the application

can display the thumbnails for them even if they have multiple pages. Image Thumbnail CP ActiveX Control allows you to add a vertical and horizontal scroll bar to the thumbnail browser and you can also rotate the clips the way you want. Since images tend to lose quality when they are resized, the library enables you to maintain the aspect ratio of the original files. Using it, you are also able to overlay caption text and adjust the

background, highlights, shadow, font size and text color. You are able to define the viewing area of the browser you can create making it possible to display as many thumbnails as you want. Image Thumbnail CP ActiveX Control is a library that works just fine with programming languages that support ActiveX, such as Access, C# 2005, Delphi, Visual Basic, Visual FoxPro and Visual C.
